TABLE OF CONTENTS

Lindenmeyr Munroe

PACKAGING SPECIALISTS
Consultants will analyze and evaluate your facility, providing unique solutions tailored to your operation's needs.

LOCALLY STOCKED INVENTORY
A comprehensive selection of packaging materials and equipment solutions stocked at a warehouse near you. See the following pages for our product lineup!

ORDERING MADE SIMPLE
Our state-of-the-art e-Commerce site gives you the power of information any time of day or night. Shop online at **LindenmeyrMunroe.com**

QUESTIONS?
Contact your local Lindenmeyr Munroe sales or customer service representative.

LOCAL TRUCKS
Our fleet of trucks are ready to roll with your next day delivery.
PS - Track your orders online with the real-time delivery feature!

+ ADDITIONAL SERVICES
- In-house service technicians for equipment installation, training and preventative maintenance
- Sustainable packaging design solutions
- Custom designed packaging
- Retail package design
- Vendor Managed Inventory (VMI) programs

CORRUGATED BOX STYLES

REGULAR SLOTTED CONTAINER (RSC)

All flaps have the same length, and the two outer flaps (normally the lengthwise flaps) are one-half the container's width, so that they meet at the center of the box when folded. If the product requires a flat, even bottom surface, or the protection of two full layers, a fill-in pad can be placed between the two inner flaps. This is a highly efficient design for many applications. There is very little manufacturing waste. The RSC can be used for most products and is the most common box style.
HALF SLOTTED CONTAINER (HSC)

Same as Regular Slotted Container without one set of flaps.

FULL OVERLAP SLOTTED CONTAINER (FOL)

All flaps have the same length (the width of the box). When closed, the outer flaps come within one inch of complete overlap. This style is especially resistant to rough handling. Stacked on its bottom panel, the overlapping flaps provide added cushioning. Stacked on its side, the extra thickness provides added stacking strength.

ONE PIECE FOLDER (OPF)

One piece of board is cut so that it provides a flat bottom, with flaps forming the sides and ends, and extensions of the side flaps meeting to form the top.
FIVE PANEL FOLDER (FPF) OR HARNESS STYLE FIVE PANEL FOLDER

A single cut and scored piece features a fifth panel used as the closing flap, completely covering a side panel. The closed box has several layers of combined board on each end, providing stacking strength and protection for long articles of small diameter which might be damaged, or damage the box, if pushed through the ends.

MEASURING BOX DIMENSIONS

Dimensions are given in the sequence of length, width and depth. Internationally, the words length, breadth and height may be used to express these dimensions. The dimensions of a box are described based on the opening of an assembled box, which can be located on the top or the side, depending on how it is to be filled. The opening of a box is a rectangle; that is, it has two sets of parallel sides. The longer of the two sides is considered its length, the shorter of the two sides is considered its width. The side perpendicular to length and width is considered the depth of the box.
FIVE PANEL FOLDER & WRAP-AROUND   **END LOADING**   **TOP LOADING**

Dimensions can be specified for either the inside or the outside of the box. Accurate inside dimensions must be determined to ensure the proper fit for the product being shipped or stored. At the same time, palletizing and distributing the boxes depends on the outside dimensions. The box manufacturer should be informed as to which dimension is most important to the customer.

FOLDING CARTON BOX STYLES
Examples of our most popular styles
Reverse Tuck

Ends tuck into box from opposite directions. Most economical layout due to tight nesting.
Tuck Top/Auto Bottom

Also called "crash-lock" bottom. Bottom pops into place automatically, increasing filling speeds in hand fulfillment operations.
Straight Tuck

Ends tuck into the box from the same direction. Presents a more finished appearance on the face.

Snap Lock Bottom

Also called a 1-2-3 bottom. Bottom is assembled with overlapping tuck flaps for additional strength.

Straight Tuck with Header

If a carton is to hang on a rack, the hanger extension requires the carton to be a straight tuck.
Infold Trays

Glued style that ships flat and then pops into a carton. Ideal for applications like food, stationery or clothing.
Seal End

Designed for use with high-speed automated filling equipment. Ends are glued by the machine during fulfillment.
Counter Top Display

Counter top displays are frequently designed as the shipper carton as well so they serve a dual purpose; they carry and display the product for you.
Tab Lock Tray with Lid

Inexpensive style to assemble as it requires no gluing. Ideal for presenting applications like sample or media kits.
Dispenser

Display and dispenser styles are numerous. This is a popular style because the carton can be loaded and reloaded from the top for continuous stocking.

Simplex

Economical 2-piece style. No gluing required, making it easy to assemble. Also stores and ships flat.

TAPE

THE COMPLETE **PACKAGE.**

PACKAGE **BRANDING.**

Printed Tape: Showcase your brand by custom printing your logo and promotional message directly on the tape – a cost-effective solution to printing on the box.

Printed Air Pillows: Reinforce your branding message inside the box with your logo and call-to-action.

PACKAGE **SECURITY.**

Water-Activated Tape: When moistened, water-activated tape (WAT) welds to the box it is being applied to, becoming part of the box. This seal is tamper-evident and reliable in dusty, dirty, extreme cold and humid conditions.

Pressure-Sensitive Tape: IPG's hot melt carton sealing tape with Corru-Grip™ technology is designed for optimal closure of highly recycled corrugate, including 100% recycled boxes.

PACKAGE **PROTECTION.**

Paper Void Fill, Cushioning & Systems: Why choose paper for your company's void fill and product protection? Because it's versatile, cost-effective, easy-to-use and eco-friendly. Void fill and cushioning produced by PaperSpace Paper Systems and HexcelWrap are 100% curbside recyclable!

Mailers: Easy-to-use and more cost effective alternatives to boxes and other containers. Each mailer is durable and lightweight, can be custom printed, and is available in standard and custom sizes.

Air Pillows & Machines: Brace and protect your items during shipment with AirSpace air pillows. Recyclable, clean and transparent, they allow products to be seen while secured. Produce void fill on-demand with AirSpace air pillow machines – the fastest on the market!

Bubble & Foam Cushioning: DurabubbleRP provides cost effective packaging bubble for superior wrapping, cushioning and surface protection. Starfoam is highly resistant to punctures, tears and impact and provides excellent surface protection and cushioning for everything from sporting goods to auto parts.

Shrink & Stretch Films: From pizza to paper cups, IPG's shrink film solutions help reduce packaging costs, improve package appearance, and increase output. Our variety of stretch films hold your palleted loads together for shipment or warehouse storage.

PACKAGE **AUTOMATION.**

Case Sealing Machines: For businesses growing exponentially, fulfillment automation is the answer! IPG's case sealing machines help improve productivity, reduce labor, reduce material usage and improve ergonomics.

Tape Dispensers: As the market leader for water-activated tape, IPG's commitment continues with our complete line of Better Pack® dispensers, trusted by many top internet retailers.

ADHESIVE TAPE SOLUTIONS FOR INDUSTRIAL APPLICATIONS

tesa® 4965
High Temperature & Shear Resistance

- Polyester (PET) backing coated on both sides with a transparent modified acrylic adhesive
- Suitable for long term outdoor applications; can be exposed to harsh environmental conditions
- Great adhesion on difficult to bond surfaces

tesa® 51966
Excellent Tack & Good Chemical Resistance

- PET backing and a highly tackified adhesive
- Suitable for long-term applications
- Good combination of benefits from 4965 and 4970

tesa® 4970
High Tack & Immediate Adhesion

- PVC-film backing
- Ideal for mounting decorative point of sale materials and displays
- Perfect option for mounting on rough surfaces
